EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jun-Young E. Jeon (Reg. No. 43,693) on February 3, 2006.

The application has been amended as follows:

In claim 17 line 3 the term "adapted" has been omitted.

In claim 17 line 19 second occurrence of the term "and" has been omitted.

In claim 17 line 23 the terms --; and wherein the central control unit further comprises means for updating the sequence number at an end of a business day on which the armored car pickup occurred to match the alternate sequence number—has been inserted after the second occurrence of the term "number".

Claim 18 has been cancelled.

Claim 19 line 1 the term "18" has been replaced with --17--.

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of the claims 1-10, 25 and 26 in this case is the inclusion of the means for generating the pair of identifiers that indicate if the deposit information was accumulated during an accounting period prior to a predetermined event or during an accounting period after a predetermined date by making the

identifiers different or identical to each other and where the identifiers do not contain values including a date or time of the predetermined event.

The primary reason for allowance of the claims 17, 19 and 20 in this case is the inclusion of the means for updating an alternate sequence number when an armored car pickup occurs, where the sequence number and the alternate sequence number do not contain any date or time information and means for updating the sequence number at the end of a business day on which the armored car pickup occurred to match the alternate sequence number with the sequence number.

The combination as claimed was not reasonably found in the prior art of record.

Bewersdorff (DE 4323765) discloses a cash control system but does not disclose the use of sequence and alternate sequence numbers as claimed for determining when the cash was received.

Affinity Technology Group discloses cash safe control systems but does not disclose the use of sequence and alternate sequence numbers as claimed for determining when the cash was received.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elaine Gort whose telephone number is 571/272-6781. The examiner can normally be reached on Monday and Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alexander Kalinowski can be reached on 571/272-6771. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
